

JB&Co. – Data Analyst Skill Test

Candidate Name: Kannav

Role Applied: Data Analyst – Sales & Marketing

Tool Used: Power BI, Excel

1. Objective

The objective of this analysis was to clean, organize, and visualize multi-channel sales data from **Amazon, Flipkart, Retail, and Wholesale** platforms. The goal was to identify top-performing channels and products, analyze sales trends, and generate actionable insights to support strategic business decisions.

2. Data Cleaning & Preparation

- Removed duplicates and standardized product names for consistency.
- Checked and handled missing values across all datasets.
- Verified column formats (dates, numbers, text) for uniformity.
- Ensured correct alignment between *Revenue*, *Discount*, and *Units Sold* fields.

3. Data Consolidation

- Combined three datasets (**Amazon, Flipkart, Retail & Wholesale**) into one master sheet.
- Added a new column '**Sales Channel**' to identify the source of each record.
- Created relationships in Power BI for seamless cross-channel analysis.

4. Data Analysis

- Calculated **Total Sales, Revenue by Channel**, and **Product-Wise Performance**.
- Identified **Top 5 Products** contributing the most to total revenue.
- Analyzed daily and monthly sales trends to detect seasonal demand patterns.
- Estimated overall sales growth and compared channel contribution.

5. Visualizations Created

1. **Revenue by Channel Chart** – Compared sales performance across Amazon, Flipkart, and Retail/Wholesale.
2. **Product-Wise Sales Funnel** – Highlighted best-selling SKUs and their revenue share.
3. **Daily Sales Trend Line Chart** – Displayed daily fluctuations and key revenue spikes.
4. **KPI Cards** – Summarized Total Revenue, Total Units Sold, and Channel Contribution.

All visuals were designed in a chocolate-themed dashboard consistent with the JB&Co. brand style.

6. Key Insights Summary

After cleaning and merging the sales data, total revenue reached approximately **₹1 Million**, with **2,348 units sold** overall.

Amazon emerged as the top-performing channel, driving the largest revenue share.

Among all SKUs, **Dry Fruit Mix 100g**, **Power Munch 200g**, and **Almonds 500g** were the highest-selling products.

The mid-month period showed the most significant growth in daily revenue.

E-commerce channels (Amazon & Flipkart) outperformed offline channels, highlighting a shift toward digital retail demand.

7. Conclusion

This analysis provided a clear view of JB&Co.'s sales performance across multiple platforms. The findings suggest that focusing more on online marketplaces and maintaining top-performing product lines could further optimize sales and profitability.
